Subject: Clarification for handling responsive documents that are copywrited

Categories: FOIA

Hi Kenneth, we have three documents that are responsive to your request FOIA Number EPA-R10-2015-007127 for the date range May 2 thru May 15, 2015, that are published documents. One document is an AWMA article, *Monitoring and Source Apportionment of PM near a Large Phosphorus Production Facility* and it is copywrited, two other documents, *Ryan Waddell et al, Low-cost detector for the continuous monitoring of phosphine fumigation*, and *Thorn Chodynieski et al., Continuous Real-Time Monitoring of Phosphine Concentrations in Air Using Electrochemical Detectors Interfaced by Radio Telemetry*, may be part of a larger copywrited document. As there are restrictions on copying and producing copyright material, were asking if you could clarify that your FOIA request, number EPA-R10-2015-007127, would be met if we were to provide you with these titles and sources of these documents that are copyrighted or may be part of a larger copywrited document.
